Special Issue:

Proceedings of the Conferences Valparaíso Numérico II

Volume 13 | New Series | 2006 | ISSN 0716-8446 | eISSN 2810-7519

CONTENTS

Preface	1
Scientific Program	2
List of Participants	4
Salim Meddahi and Francisco-Javier Sayas, BEM-FEM coupling for wave-structure interaction	5
Mauricio Sepúlveda and Octavio Paulo Vera Villagrán, Numerical Methods for a transports equation perturbed by dispersive terms of 3rd and 5th order	13
Raimund Bürger, Alice Kozakevicius and Mauricio Sepúlveda, A multiresolution finite difference scheme for spatially one-dimensional strongly degenerate parabolic equations	22
R. Bürger, A. García, K.H Karlsen and J.D. Towers, A note on an extended Clarifier-Thickener model with singular source and sink	36
Tomás Barrios, Adaptive solutions of an augmented mixed finite element scheme for linear elasticity	46
A. Bermudez, L. Hervella-Nieto, A. Prieto and R. Rodríguez, Numerical simulation of time-harmonic scattering problems with an optimal PML	58
Rommel Bustinza, A note on the local discontinuous Galerkin method for linear problems in elasticity	72
Ignacio Muga and Sebastián Ossandón, A method to compute the Surface Green's Function of a Piezoelectric Half-Space	84
